

Georgian Bar System Specification

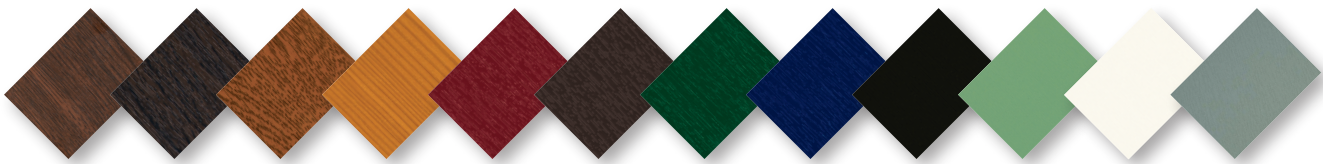

KÖMMERLING®

Georgian Bar System Specification

- 1 Option of either chamfered or featured Georgian Bar.
- 2 Comprises of edge clips, centre clips, and bars with mitred ends.
- 3 Both bars are 25mm wide and 16mm deep for an authentic finish.
- 4 Available in White Ash, Golden Oak, Irish Oak, Rosewood, Black, Grey, Cream and Chartwell Green.
- 5 Can be toe and heeled during installation.
- 6 Removes issue of failed 'stick on' alternatives.
- 7 Provides a more authentic finish.

Now available in over 40 colours.

► Innovation and Energy Efficiency

Like all of our window and door products, our C70 and O70 Gold systems are packed with innovative product features. The 5-chambered design is far more energy efficient than the 3 chambered designs of yesteryear, resulting in more cost effective glass options for fabricators, installers and specifiers. With Building Regulations planned to change again in 2013, our PVCu window and door systems will lead the way.

Kömmerling and parent company, profine Group, also lead the way across Europe with their lead-free Greenline compound that was developed 7 years ago. In the UK many Systems Companies still use lead as a stabiliser in their PVCu compound. At profine, we understand the importance of the environment in terms of harmful materials and energy efficiency.
